

# HIPAA Made Easy

## Cyber Security Especially for Dental

### Did you know...

All of these are HIPAA violations

- Lack of a proper, enterprise-level risk assessment
- Not managing passwords and auditing who and who cannot log in to your network – including new and temporary employees and contractors
- Anti-virus software and firewalls that are not of the proper class and up-to-date
- Vendors and consultants not under proper business associate agreements
- Not protecting remote connections – such as when staff connect to your network from home

**DDS Rescue** is a different kind of IT company. We are a **CYBER SECURITY** company focusing on **COMPLIANCE, RECOVERY & CONSULTING** for dental practices.

### HIPAA Made Easy Program

- Step-by-step HIPAA compliance plan designed for dental
- Includes the required enterprise-level HIPAA risk assessment
- Minimal impact on practice and staff
- Helps avoid costly downtime
- 2 CE credits

Know that **YOU** are the only one who is responsible for HIPAA compliance and preventing data breaches in your practice. Go with a company that delivers **HIPAA MADE EASY**.

### Beware of the Do-It-Yourself Manual!

These manuals **DO NOT** include the proper enterprise-level risk assessment, so they **DO NOT** get you HIPAA compliant on their own!
