

NEW! SECURITY ADVANTAGE PLAN

The Proactive Approach to Secure Your Computer Network

Data breaches at dental offices are becoming more common every day and HIPAA violations are devastating practices. Protect your practice with DDS Rescue's Security Advantage Plan, built especially for dental.

Monthly Windows updates - We keep your network up-to-date to protect your servers and computers from malicious attacks. This allows you to access new features and eliminates security loopholes from outdated programs.

Enterprise-level antivirus protection - We protect you from viruses that perform malicious acts, such as deleting files, accessing personal data, or using your computers to attack other computers.

Firewall management - We handle all subscription updates so your practice is shielded from malicious network traffic.
