

TECH SERVICE SAFETY

SAFETY IS TOP OF MIND

The safety of our Technicians, your team, and patients are our top priority! To prevent the spread of illness and keep everyone safe, we have provided training and guidelines for our Technicians to follow while in your office.

TECH SERVICE APPOINTMENT

Service calls are essential to running your clinic, so Patterson is taking every precaution to keep you, your staff, and patients safe. Our Patterson Technicians will attempt to do pre-calls to discuss protocols and safety measures including the processes you've implemented within your office. Our goal is to successfully get your equipment and technology back up and running with a strong focus on everyone's safety.

PPE, YOUR TECH, AND YOUR OFFICE

We have provided Personal Protective Equipment (PPE) to our Technicians and trained them on minimizing the risk of COVID-19 transmission and cross-contamination. Our Technicians will follow your state or local guidelines for proper PPE protocols and take necessary measures before, during, and after services are provided.

We want to assure you that safety is our main priority. We will continue to work closely with you and your office as we provide essential services to ensure your office is up and running smoothly.
